

AIME Affiliate Membership Package - 087

General

AIME membership includes the UK's largest 087 network operators, BT, Opal Carphone Warehouse, C&W and Kingston Communications. Their ongoing support of AIME has ensured that the commercial interests of the premium rate services industry are thoroughly represented to regulators and government.

With the hand over of 087 regulation from Ofcom to PhonepayPlus (PP+) all providers of 087 services will be required to abide by the PP+ Code of Practice. It is therefore important that your business has a level of information and representation that ensures full knowledge of how to comply with rules affecting your business, but also that your commercial interests are represented through a membership organisation that can represent industry views with one voice.

Benefits

Representation
